

**gorenje**

2011-12

KITCHEN APPLIANCES

Established in 1950, Gorenje is one of the fifth largest household appliances manufacturers in Europe. Gorenje is an international corporation made up of a parent company Gorenje, d.d., and 59 international companies, present in 70 countries all over the world.

Gorenje is a company of ambitious visions. It seeks to approach its markets as a leader rather than a follower. It is stepping boldly towards the future, without hesitation or faltering. With its innovative, technically perfect, environmentally friendly and stylish products, Gorenje aims to become the producer of the most innovative design-led appliances in the world.

**60** YEARS OF CREATIVITY

# EXPERIENCE FROM THE PAST.

For the past 60 years, Gorenje has been a brand of excellence that consistently produces domestic appliances of the highest quality. Followed by the first patent awarded in 1956, Gorenje has over 150 patents and numerous innovation awards to this day, a fully successful 60 years later.

# SOLUTIONS OF TODAY.

# A VISION FOR THE FUTURE.

The Red Line

THE COMFORT OF BEAUTY  
THE BEAUTY OF TECHNOLOGY

**"DESIGN IS BOTH.."**

We believe that quality and functionality can afford to be noticed, and that design should attract, it should stand out and inspire. Working collaboration with great names of international design, we have managed to combine design, quality and ease of use, which has been recognized by winning a number of prestigious international design awards.

Open to new ideas, we use the latest technology to transform everyday household items into desirable objects of beauty that are also environmentally efficient. Dedicated to being user friendly, we understand people needs. Committed to superb, yet accessible design, we aim to create new perspectives in the art of living.

Our state of the art technology is effortless and sets no limit, it inspires a new open-minded approach to home living.

**THE ENVIRONMENT IS THE FOUNDATION OF OUR FUTURE. WE PRESERVE IT.**

Today, about 40 percent of CO2 emissions are generated by households. An old appliance can consume two or three times more resources than the latest models. The purchase of the best energy rated appliance is a worthy long-term investment that will save your money and the environment.

By changing the way we live, taking an interest in sustainable living and introducing new energy and water efficient appliances into our homes, would not only provide substantial household savings, but would contribute to reduce the pressure on our planet's resources.

Today, our quality of living is closely related to the care of the environment. While complying with the most stringent environmental protection standards (ISO14001 and EMAS), Gorenje is developing environment-friendly technologies and processes that have the least impact to the planet. By offering products made of environment-friendly materials and by including of functions that deliver considerable power and water savings throughout that appliance's useful life, we join you in common efforts to preserve the environment for the generation to come.

THE PLANET IS  
OUR HOME

## OUR FUTURE DEPENDS ON THE ENVIRONMENT

Investing in environment-friendly technologies – even more than required by the legislation – is a token of responsibility both to our environment and to the generations to come. With regard to environment protection, Gorenje is at the top of European industry in terms of both appliances development and technological procedure management.

### CHANGE IN THE ANNUAL ELECTRICITY & WATER CONSUMPTION OF GORENJE APPLIANCES FROM 1995 TO 2010:

#### OVEN

- Nearly all Gorenje ovens fall into energy class A.
- EcoClean enamel retains heat and thus consumes less energy.
- Aqua Clean function lets you to clean your oven with water only and in low temperature.

#### INDUCTION HOB

- With using Gorenje ExtremePower induction hob, cooking time is 1/3 less than cooking by gas hob and save up to 50% energy.

#### REFRIGERATORS

- Gorenje was the **first** one in Europe to reduce and then to abolish the use of ecologically unfriendly cooling and push agents which warm the environment and destroy ozone (in 1993).
- All Gorenje refrigerators have received A+ or A rating for European energy performance and Class 1 rating for HK energy label, which can bring you energy savings of up to 25%.

#### DISHWASHERS

- Gorenje dishwashers with A rating for energy efficiency, consumes only 12 liters of water per washing cycle, while 80 liters of water would be required for washing up the same quantity of dishes by hand. Water saved per week is equivalent for a full bath.

\* All Gorenje appliances are made of materials which can be recycled to more than 95%.

**THE TOUCH OF LIGHT. A FUSION OF MINIMALISM AND COLOUR, PURE AND BOLD, FUNCTION AND INTERACTIVE.**

# PINK IS THE NEW BLACK KARIM RASHID. A GLOBAL MODERN DESIGN.

New York-based designer Karim Rashid is one of the most prolific designers of his generation. Over 3,000 designs in production, over 300 awards and working in over 35 countries attest to Karim's legend of design.

The award-winning industrial designer has undertaken projects for hundreds of clients all around the world; Alessi, Artemide, Audi, Bozart, Cappellini, Estée Lauder, Giorgio Armani, Issey, Kenzo, Prada, Sony, Toyota and Umbra, just to name the most prestigious ones.

His style is best described as sensual minimalism. His ideas are techno-organic and info-aesthetic. They combine natural soft lines with convenient solutions.

*“ GOOD DESIGN IS A RAPTURE OF EXPERIENCE. I BELIEVE OBJECTS AND SPACES SHOULD NOT BE OBSTACLES IN LIFE BUT RAPTURES OF EXPERIENCE. OBJECTS BECOME THE ORGANISMS WE LIVE WITH. ”*

# ICON OF

A contemporary collection, distinctive for dynamic design, rounded lines and high-quality aluminium finish. Innovative design and cutting-edge technology leave an impression of colourfulness and versatility.

The magical light of vertical LED-illuminated strip evokes an individual experience of the space. Responding to a gentle touch, it will colour your world in one of the seven hues - for a while, or just for a moment.

**MoodLite TECHNOLOGY. A TOUCH OF LIGHT AND COLOUR. DAY IN, DAY OUT, YET DIFFERENT EACH DAY.**

It allows a play of colour, and affords endless freedom to the inspiration and emotions of each moment. Do not adapt to the moment - let the moment be shaped by your desires.

MysticWhite, BabyPink, HotPink, DeepPurple, SkyBlue, LimeGreen, JuicyOrange. Your home can be different each day and each moment.

# CHARM YOUR SENSES

**INNOVATIVE TECHNOLOGY. A TOUCH OF PERFECTION. REFLECTIONS OF MAGICAL LIGHT AND MODERN AESTHETICS.** The colour of light echoes the colour of the moment. New generation ovens proudly feature a number of patented innovative solutions.

## MoodLite

Aesthetics or functionality? Our cutting-edge technology delivers both. MoodLite technology does not only create the ambiance with the desired hue of colour; when activated, it also affords a look into the oven interior, while the red tint will warn you of high oven temperature.

## HomeMADE

The innovative design of the HomeMADE oven cavity, featuring a vaulted ceiling and rounded side walls, couples with precisely thought-out heater placement, delivers superior cooking results. This unique design is inspired by traditional wood-fired bread ovens relies on highly efficient and fully uniform distribution of hot air.

## DirecTOUCH

A perfect result in only three simple steps. Numerous preset programmes automatically set the right combination of cooking parameters and make sure for the excellent cooking result.

## TOUCH THE MAGIC

**PURE AESTHETICS. UNIQUE GRAPHICS. A TOUCH THAT STIRS UP NEW EXPERIENCES.**  
The alluring lines in the graphical pattern will seduce your senses. Discretely, subtly, yet convincingly they stress the sensuality of minimalism.

### PowerBoost

The cutting-edge white hob boasts speed, low power consumption, safety, and touch control. The PowerBoost function additionally increases the performance and capacity of the induction zone.

## LIGHT YOUR WAY

THE FRESHNESS OF NEW FORM. INNOVATIVE FEATURES. ENDOW YOUR SPACE WITH AIR AND LIGHT. A single touch of the MoodLite strip will turn the space into an oasis of select hues that will caress the senses and evoke a very special atmosphere.

### MoodLite

The multi-colour LED-illuminated stripe visually merges the cooker hood with the oven. Colours for every mood and ambiance. Smoothly uniform and harmonious.

### Touch Control

The electronic setting of the cooker hood is a breakthrough in user-friendly operation. Carefully studied positioning of the control section on the LED-illuminated stripe enables simple setting of the extraction power, adjustable in four levels.

## BO87KR Built-in oven

### Design:

- Brushed aluminium finishing
- LED illuminated stripe: 7 colours
- HomeMADE design cavity

### Features:

- DirectTOUCH electronic control
- 13 cooking functions :
  - Conventional heating (upper heat + bottom heat)
  - Upper heater
  - Bottom heater
  - Small variable grill
  - Large variable grill
  - Large variable grill with fan
  - Hot fan
  - Bottom heat with fan
  - Bottom heat with hot fan
  - FastPreheat
  - WarmPlate
  - StayWarm
  - Defrost
- 8 automatic programmes setting
- 3 memory settings
- Start delay
- Alarm timer

### Cleaning features :

- AquaClean
- EcoClean enamel
- Full glass inner door
- Removable oven door
- Drop down grill element

### Safety systems :

- DynamiCooling System+
- Cool Door (3-layer of glass)
- Child lock
- Safety door lock

### Technical information:

- 65L usable volume
- 275°C max. temperature
- Total connected load: 3300W

### Supplied accessories:

- 3-level telescopic guides
- 1 deep baking tray
- 1 shallow baking tray
- 1 oven grid
- 1 grease filter

### Appliance dimensions:

- 595H x 597W x 547D

### Built-in dimensions :

- 583-590H x 560W x 550D

### Made in E.U.

Indent Only

If a piece of kitchen furniture with a handle for opening (2) is installed under the oven (a drawer, cupboard), the distance between the bottom of the piece of furniture (1) and the upper edge of the handle (2) must be at least 8mm.

DESIGNED BY  
*fentim*

## IT641KR Built-in 4-zone induction hob

### Design:

- White ceramic glass
- Aluminium grinded edges

### Features:

- Smart touch control
- 9 power levels
- Booster function on all zones
- Melt/ keep warm function
- Stop/Go function
- Minute minder
- Timer

### Safety systems:

- Residual heat indicator
- Pan detection
- BoilControl
- Safety switch off
- Overheat protection
- Child lock

### Technical information:

- Cooking zone output (diameter):
  - Front left: 2.3/3.7 (210mm)
  - Front right: 1.85/3.0 (180mm)
  - Rear left: 1.4/2.2 (145mm)
  - Rear right: 1.85/3.0 (180mm)
- Total connected load: 7400W

### Appliance dimensions:

- 514H x 600W x 43D

### Cut out dimensions:

- 490H x 560W

### Made in E.U.

## DQGA65KR 60cm wall mounted cooker hood

### Design:

- Brushed aluminium finishing
- LED illuminated stripe: 7 colours

### Features:

- Electronic touch control
- 4 speed levels
- Exhaust or recirculated air operation

### Technical information:

- Max. airflow: 730m<sup>3</sup>/hr
- 2 x 20W halogen light bulbs
- 1 aluminium grease filter
- 150mm tube connection
- Optional charcoal filter
- Total connected load : 220W

### Appliance dimensions:

- 1040-1550H x 595W x 382.5D

### Made in E.U.

THE SECRETS BEHIND GREAT DESIGN –  
***GORENJE PININFARINA***

<http://www.gorenjepininfarina.com/>

# DESIGN THAT LASTS

Paolo Pininfarina, chairman of Pininfarina S.p.A., is a globally renowned designer famous for its automobile designs – most notably, the cult Ferrari. Its cooperation with Gorenje dates back two decades. Gorenje and Pininfarina believe that by combining the principles of excellence in design and the latest technology, they have created future classic, a design that is determined to survive, outlive trends and become an icon - Design That Lasts.

*“ THE  
COMPLEMENTARITY  
OF TOP DESIGN,  
ADVANCED  
TECHNOLOGIES  
AND INNOVATION  
IS OBVIOUSLY A  
GOOD FORMULA  
FOR SUCCESSFUL  
COOPERATION “*

## HOB

SlideTouch control

No superfluous details such as knobs or buttons should steal the attention from the pure and simple form. With the touch of a finger, all heating areas can be controlled. It is both practical and beautiful.

THE COLLECTION HONOURS CLASSIC TRADITION, YET UPGRADES IT FOR A NEW GENERATION AND EMBRACES THE ESSENCE OF PERFECT DESIGN; CONSISTENCY THAT LASTS AND ENDURES THE TRIALS OF CHANGING TIMES.

## OVEN

Touch control display

The oven features a solid aluminium handle which cross the black glazed surface like a bridge and a touch control screen decorates the upper part of the oven.

HomeMADE

The innovative design of the HomeMADE oven cavity, featuring a vaulted ceiling and rounded side walls, couples with precisely thought-out heater placement, delivers superior cooking results. This unique design is inspired by traditional wood-fired bread ovens relies on highly efficient and fully uniform distribution of hot air.

27 auto programmed recipes

27 recipes are prepared for your easy access. Just select the dish that you want to cook and place it in the correct shelf level (as shown in the display), then press start. Just a piece of cake then you can get your dish well done.

## REFRIGERATOR

### Touch control screen

The easy to use interactive screen extends the refrigerator functions and gives information on a number of useful features including food storage and energy saving.

### Quick view

A band of black glass flows down the front of the fridge freezer doors. By touching the screen, a square area of that band becomes transparent. This window offers a practical but always tantalizing glimpse of what is inside the fridge.

### Energy saving mode

With at less frequent use, you can turn on the Eco mode to ensure optimal temperature conditions, giving you excellent energy savings over time. When you leave on an extended vacation, you can simply activate the Go'n'Save vacation mode, which automatically sets and maintains the refrigerator temperature at 9°C/ -18°C . This will ensure optimal food storage condition as well as maximize energy efficiency.

### In 'n' Out tray

The combination of dark natural wood & solid aluminium creates a unique shelf which is versatile, multifunctional and can be used as a serving tray.

### Zero 'n' Fresh drawer

It provides a 0°C fresh zone for storing vegetables, fruit and meat approx. 3 times longer than in the traditional refrigerator.

### Cosmetic boxes

Two small boxes set in the door are the perfect place to store small items such as cosmetics or medicines.

# THE COOL GALLANT.

IN SPIRIT. REVEAL. SOMETHING BREATHTAKING.

CLEAR. AS CRYSTALS. THEY MAKE YOUR HEART SING AND DELIGHT YOUR EYES.

At Gorenje, we do not wait for inspiration to reveal itself. We find it. And when we do, we nurture it. For our refrigerator to be hand-encrusted with thousands of Swarovski crystals. It will probably be the world's most extravagant refrigerator.

Simplicity is its motto. It wears black in order for the crystals to shine through, offering them modestly to the jealous eye. This is not a dream. Wherever you put it, it will be the center of the attention. It does not have to prove itself to anyone.

<http://www.gorenje.com/inspires>

### Touch control display

The interactive touch control display can be set in your own language and extends the refrigerator functions. A simple touch on the LCD screen is all it takes to access numerous functions offered by the appliance, such as the integrated radio tuner with high-quality stereo sound, a list of recipes with information on the calorie, or advice on storing particular types of food.

### Microbes Stop function

Bacteria is present wherever there is food, that is why hygiene is of utmost important in the kitchen. The antibacterial protection provides the most efficient protection during the entire life of refrigerator, preventing micro-organisms from coming into contact with food.

### Zero 'n' Fresh drawer

The sensor controlled temperature is maintained at about 0°C in the Zero 'n' Fresh pull-out drawer and provides an ideal environment for the storage of perishables, locking in and preserving their freshness for longer.

### Big 'n' Freeze drawer

This special freezer pull-out drawer will impress you with its exceptionally large capacity and outstanding accessibility to the stored frozen items. Equipped with telescopic guides, the drawer can be pulled out entirely – without the danger of falling out.

### Tube holder

It enables easy storage of tubes, eliminating the usual mess. Since tubes can be placed in the holder upside down, their contents are easily accessible even when a tube is almost empty.

## NRK67358SB Freestanding refrigerator

### Design:

- Black with 3500 Swarovski crystals

### Features:

- Electronic touch control
- Multi-flow air system
- Microbes Stop protection
- No frost
- Digital temperature indicator
- Separate temperature control of refrigerator and freezer
- Vacation mode
- Eco function
- Cookbook & calorie tips
- Clock setting
- Language setting
- Cleaning tips
- Child lock
- Warning alarms
- Door opening: right hinge
- Adjustable feet

### Fridge section:

- Fast cooling
- 3 adjustable glass shelves
- 1 Zero 'n' Fresh drawer
- 2 vegetable drawers
- 4 door shelves
- In 'n' Out serving tray on telescopic guides
- Flexible egg tray
- Tube holder
- Safety holder
- Odour filter

### Freezer section:

- Fast freezing
- 1 rapid freezing drawer
- 1 Big 'n' Freeze drawer
- 1 storage compartment
- 2 ice trays

### Technical information:

- 2 compressors
- Net capacity:
  - Total: 320L
  - Fridge: 245L
  - Freezer: 75L
- Annual energy consumption: 357kWh
- Freezing capacity: 10kg
- Safe storage period if power failure: 18hrs
- Door opening: right hinge

### Appliance dimensions:

- 2000H x 600W x 640D

**SMARTABLE.**

A TRANSFORMATION OF SPACE.

A BIG CONCEPT OF THE NEW CULTURE OF LIVING. THE SMARTABLE WITH AN INTEGRATED REFRIGERATOR. **THE NEW CONVERTIBLE!**

<http://www.smar-table.com/en/>

## WHAT'S YOUR NOTION OF PRESTIGE?

You bet on the new. You dare to live with the new. True luxury lies not in the price but in the options offered. True luxury is living according to your own individuality. That is what makes SmarTable a luxurious invention. A SmarTable with an integrated refrigerator is an independent and free element of interior design in an elite setting. You decide where to actualized its real value. That is the true sense of prestige.

## A REVOLUTIONARY DESIGN CONCEPT

What is the purpose of a table? Where is the proper space for a fridge? Forget the dully predestined everyday concepts. Do not restrict your mind to straight horizons. An innovative change in reasoning has placed a refrigerator where cool gourmet delights are the most welcome: at the heart of a table, at the focal point of a social space, a conference room, or an eminent reception hall. The new convertible is a daring reply to such everyday questions.

## LUSH VERSION OF THE GOOD LIFE

It stores and cools select beverages and food for six to eight people. Exquisite champagnes, wines, other beverages as well as cold cuts, delis, fruits, vegetables, and cool appetizers will enrich your business and social gatherings as well as those welcome quieter moments of privacy. A cheese platter for breakfast, a multi-course culinary masterpiece for dinner and many smaller pleasures any time in between.

## THE SUPERIOR MASTER OF SURPRISE

Refrigerated plateaus with food and beverages will appear on the table upon a single touch on the remote control. The central cylinder supports the luxurious surface and houses a fully integrated refrigerator with adjustable shelves attached to a rotating shaft. A remotely controlled mechanism raises and lowers chilled revolving plateaus to the desired height.

# A PRESTIGIOUS CHOICE: 14 PRECIOUS MATERIALS

You choose the luxurious material from which it will be crafted. You choose the shape and size. 14 precious materials are available – from solid granite to a selection of tinted glass or wood. Upon request, the SmarTable can be customized to meet individual requirements, creating the perfect harmony with the convertibility of almost any space of your choice.

## REFRIGERATOR COMPARTMENT: LACQUER-COATED STEEL OR STAINLESS STEEL AND SILIGOR

The refrigerator is housed in a decorative casing made of lacquer-coated or stainless steel. The base is made of artificial stone Siligor.

The central refrigerator compartment can also be ordered as a stand-alone element. The refrigerator compartment, when purchased without the table top, can be installed or built into any other piece of equipment.

## INTERIOR EQUIPMENT

The refrigerator has two support plateaus, or shelves. The height-adjustable shelf can be removed. The shelf support pillar is revolving. The temperature of the refrigerator compartment can be set from +1 to +15°C.

The interior refrigerator equipment is adaptable. The refrigerator can be used with one or two shelves, or without any at all. The choice depends on the type of food and drinks that are to be stored inside the SmarTable.

## A MERRY-GO-ROUND FOR MERRY SOCIAL EVENTS

The refrigerator compartment, which is integrated into the central part of the table, can be set to the desired height and rotated. Thus, it works as a turntable, allowing everyone at the table to reach for the served delicacies. Even when the refrigerator retracts back to its closed position, the central part of the table - the turntable - can still be rotated as a serving tray, hence contributing to an even more sociable atmosphere.

### Design:

- Innovative table with refrigerator inside
- Tabletop material can be selected from 14 precious materials or custom-made

### Features:

- Electronic control with remote control
- Automatic defrost
- LED interior lighting
- Accident prevention system: the system comprises of three pressure sensitive sensors, which are activated when more than 60g of weight is applied. When detected, the system automatically shuts off.

### Technical information:

- Refrigerant: R600a
- Temperature range: 1 to 15°C
- Energy consumption: 0.61kW/24h
- Total connected load: 200W
- Net weight:
  - Refrigerator compartment: 107kg
  - SmarTable base: 53kg
  - Tabletop - Wood: 37kg
  - Tabletop - Glass: 59kg
  - Tabletop - Granite: 150kg

### Product dimensions:

- Table: 1700 x 750H
- Refrigerator compartment: 933 x 750H

**THE PURE:**  
THE PERFECT LINES OF  
APPLIANCES IN HARMONY

With no rules set in stone to follow, everything is possible. Thanks to their technological perfection, the appliances enable exactly what the person touching them. These patented innovations are not only a technological novelty, but also a fresh view of how we live: each in our own distinct way. The new generation of built-in Gorenje appliances is for each of us our own private story.

The PURE line disarms with its clear surfaces emphasised by minimalistic metal elements. The colour selection and the vertical-horizontal compositions provide the harmonious link to other kitchen items. The ergonomically designed handles and knobs ensure comfortable use, as well as clear and simple control.

## A STORY FROM WITHIN.

DELIVER IT FROM THE PRIVACY OF YOUR OWN HOME, THANKS TO OUR INNOVATION. TRIGGER IT WITH OUR DIRECTOUCH PATENT. THE NEW GENERATION OF BUILT-IN OVEN BY GORENJE IS INFUSED WITH UNPRECEDENTED COOKING EXPERIENCES.

## DIRECTOUCH, PERFECT RESULTS AT YOUR FINGERTIPS

This patented electronic programme module has virtually revolutionized the touch-screen operation. Three simple steps are all it takes – cooking has never been easier!

1. Turn on the oven
2. Select the dish you want to cook
3. Press "Start"

## TOUCH CONTROL ELECTRONIC PROGRAMMING TIMER

Another innovative design by Gorenje is the sensor controlled electronic timer. Touch control enables you to set the cooking time and select the right temperature, which can be monitored on the control panel display during the entire cooking time.

# HomeMADE OVEN. A UNIQUE INNOVATION MODELLED ON TRADITIONAL WOOD-FIRED BREAD OVENS.

An innovative design solution for Gorenje oven's cavity involves a precise positioning of the heating elements and the vaulted interior, ensure an even distribution of hot air inside the oven. A unique novelty with a tint of ancient wisdom!

## Memory settings

BO8750AX allows you to have your personalized cooking setting; your favourite cooking recipes can be memorized for your easy access in the future.

PerfectGrill for a perfect crust

The large upper and the small lower infrared heating elements are safely hidden in the depths of the recessed, vaulted oven ceiling while the difference in their relative heights ensures that food is cooked evenly and perfectly. And the upper heating element can be tilted down, which makes the oven easier to clean.

**WarmPlate, for professional service**

WarmPlate will keep your crockery at precisely the right temperature - anywhere between 30°C and 80°C, which can prevent the loss of flavour. Enjoy professional service in the privacy of your home!

**StayWarm, keeping dishes at exactly the right temperature**

Setting the temperature between 30°C and 95°C allows you keep the food at the desired temperature for up to two hours. Dishes prepared in advance will retain their taste and stay warm before serving.

**FastPreheat, 200°C in 6 minutes**

By virtue of the oven's special vaulted design and concurrent operation of heating elements, it takes only 6 minutes for the oven temperature to reach 200°C. A minimum of 30% time saving.

**Extendable telescopic guides. For safety and better overview!**

Telescopic guides make it easy to take baking trays in and out from the oven and to give a better overview of the cooking. The risk of sustaining a burn is thereby significantly reduced.

**Meat probe, perfectly baked without frequent checking**

Selected models of Gorenje ovens come with a meat probe, which allows you to directly monitor and control the baking of your meat. All you need to do is insert the probe tip into the meat and set the temperature to the desired level. The indicator on the control panel will alert you when the meat is done just the way you like it.

# FOR YOUR ULTIMATE SAFETY

Cool oven panels with DynamiCooling 

A highly efficient cooling system designed to keep the temperature of oven panels down during the cooking process (DynamiCooling - DC) as well as afterwards (DynamiCooling+ - DC+) ensures significantly cooler outer surfaces of oven panels.

A fan mixes cooler ambient air with the hot air in the oven, forcing the cooled mixture to circulate right under the exterior panels of the appliance (DC). Once the oven has been switched off, a heat sensor keeps the fan going until the oven temperature has dropped below 60°C (DC+). DynamiCooling significantly improves the safety of oven cooking.

Low temperature oven door 

Gorenje ovens are fitted with safe and energy efficient Cool Door (CD), feature triple-glazed glass. More sophisticated models feature Ultra Cool Door (UCD). Superior triple-glazed glass door insulation in conjunction with 2 special reflective glass layers. A low exterior door temperature keeps you safe from burns when touching the oven door.

Oven door switch

To prevent the hot air blows directly to your face when you open the door during operation, the smart door switch switches all the heaters and the fan off when you open the door and, when the door is closed again, the heating resumed. (on selected models only)

Safety door lock

It is an effective device that prevent children from opening the oven door during oven operation, the door can only be opened by a slightly pressing your thumb to the right and simultaneously pulling the door outwards.

## THE MOST EFFICIENT CLEANING METHODS

Superior EcoClean enamel coated ovens and baking trays

The oven interior features a superior, non-stick EcoClean enamel coating, which is so smooth and impermeable that heat is reflected into the center of the cavity rather than absorbed into the panels and trays. This innovative solution produces an even distribution of heat inside the oven, which delivers significant energy savings and outstanding cooking results.

The non-stick coating also prevents fat from adhering to the panels of the oven or the tray, which in turn makes cleaning a piece of cake.

EasyClean enamel liners

BO8750AX equipped with removable EcoClean enamel coating on both side panels which makes your cleaning job easier than ever, simply wash the liners with warm water or put them in the dishwasher.

Catalytic lining

On selected models, the catalytic lining is equipped on the rear panel and is designed to help you keep your oven clean. The panel collects grease and residue during cooking cycle, and oxidizes the grease overtime.

AquaClean

Just pour half a litre of tap water into the baking tray and leave in the oven at 50°C for half an hour. Once softened, grime is easily wiped off using a soft cloth. Using no cleaners whatsoever, the result is astounding as well as environmentally friendly.

Smooth oven door surface

Easily removable oven door features no visible screw holes, rubber seals or notches, that is, no more dirt traps; which means that it can be quickly and easily cleaned.

# OVEN FUNCTIONS

In order to make your cooking quicker and easier, Gorenje oven provides you just the right cooking functions to achieve the best results time after time whatever style of cooking you require.

## Upper heat

Only the upper heating element is used. It is ideal for soufflés and vegetable gratins – or any dishes you wish to brown on the top.

## Bottom heat

The heat is only radiated by the bottom heater, use it when you wish to bake the bottom side of the dish more thoroughly.

## Conventional heating

Ideal for single shelf cooking, heat uniformly radiated and evenly into the oven interior, it is ideal for baking bread and larger cakes.

## Hot fan

The fan at the back wall makes the hot air to circulate constantly around a roast of pastry. This mode is appropriate for roasting meat and making pastry on several shelves simultaneously.

## Bottom heat with hot fan

This function is particularly convenient for making pizza, also ideal for moist or heavy pastry, fruit cakes made of leavened dough, short pastry, or cheese cakes.

## Bottom heat with fan

Used for baking low leavened dough and preserving fruit and vegetables.

## Small infra grill

This mode enables you to save energy when only a small pieces of meat to be grilled, as you don't need to switch on the whole grilling area. It is appropriate for grilling smaller quantities.

### Large infra grill

It provides even browning result for the whole baking area. It is appropriate for cooking smaller chunks of meat, such as steaks, roasts, chops, ribs, etc.

### Large infra grill with fan

It is suitable for grilling meat and large chunks of meat or poultry on one shelf level, it makes roasts perfect.

### FastPreheat

Use this function to preheat the oven to the desired temperature as soon as possible.

### StayWarm

It can be used when you wish to reheat the already prepared/ cooked dishes.

### WarmPlate

Warmed plate can prevent the loss of flavour and ensures that food tastes every bit as good as it should.

### Defrost

Only the fan is in operation. This is used for slow defrosting or thawing of frozen food.

## OPTIONAL ACCESSORIES

### Steam insert

Our special steam insert set can convert any Gorenje oven into a useful steam oven by just simply insert the steamer set into the oven cavity. A three-piece steam insert set includes a flat strainer, a deep enamel tray and a glass lid.

### Professional grilling tray

This kit is made of superior, silicon coated aluminium alloy which heats up exceptionally fast and is ideally suited for oven-cooking of culinary delights. The heat seals in the moisture, aroma and flavour, ensuring that your filets, steaks or salmon cutlets are cooked to perfection every time. And best of all, you don't need to add any fat what so ever!

### Pizza set

The tray is made of stone and doesn't need to be oiled, which ensure your pizza less greasy and extremely crispy. The three-piece pizza set includes a wooden peel, hot stone base, and a pizza cutter.

### Glass baking tray

Baking pan made of quality glass enables a permanent overview of cooking process in the baking pan.

### Extra-deep baking tray

The extra deep 5cm baking tray is specially for making home-made bread, lasagne, quiches or similar.

## BLENDED **STYLE** WITH FULL-SIZE OF **FUNCTIONALITY**

GORENJE'S COMPACT LINE IS DESIGNED TO MIX AND MATCH FOR INDIVIDUAL REQUIREMENTS. WHETHER YOU NEED TO MEET AN ENTHUSIASTIC COOK'S REQUIREMENT OR CREATE A UNIQUE SPACE AND DESIGN CONCEPT, YOU CAN SATISFY THE REQUIREMENT BY USING GORENJE'S RANGE OF COMPACT LINE.

## COMBINED STEAM OVEN

Gorenje's combined steam oven offering the possibility of preparing food with steam or hot air or even a combination of both! In addition to the numerous preset programmes and the various cooking functions, the oven distinguishes itself by a simple and comfortable touch screen operation.

### Full Steam Ahead

Steam cooking is a healthy way of preparing food, as it preserves all the nutrients, vitamins and proteins. The food is never overcooked, maintaining its colour, juices and flavour.

### Cooking on multiple levels

The steam oven enables you to steam cook your food on two levels simultaneously or bake your small cakes with the conventional hot-air method on three levels at a time! The fan at the back of the oven provides for an even and rapid distribution of the heat. The more efficient circulation of hot air ensures excellent baking, cooking and roasting results, while also saving time and energy.

### Temperature meat probe

Gorenje's steam oven is equipped with a special probe intended for monitoring the cooking of your meat. Insert the probe in the roast and set the desired temperature. The indicator on the oven control panel will alert you when the meat is done exactly the way you want it. Thanks to the temperature probe, your roast will always be perfect.

Touch control electronic programming timer

Electronic timers are an innovation of user-friendly operation. With a simple touch you can set the cooking time and temperature. You can choose from various preset programmes or set all the cooking, baking and roasting parameters yourself. Thanks to a control panel made entirely of glass, the cleaning is extremely simple, too.

### Night Mode lighting

The steam oven features the "Night mode" function, thanks to which the numbers on the screen are displayed at a lower intensity between 10 p.m. and 7 a.m., so that the screen does not waste energy or needlessly light the room.

## Several cooking methods

Gorenje's steam oven allows you to prepare food in two very different, but at the same time very simple ways.

## 50 pre-set programmes

Choose any dish from the ample selection of fifty preset programmes. The modern electronic enables you to add another ten recipes tailored to your taste, which you can save and recall the next time you use the oven.

## 6 cooking functions

There are 6 cooking functions available and suitable for defrosting and warming, steam cooking or hot-air roasting, as well as preparing dishes with a combination of steam and hot-air cooking.

## Easy cleaning

Gorenje's steam oven also comes with an excellent solution for the limescale deposits in the appliance caused by hard water. After a certain number of cooking cycles, the oven reminds you with a note on the display that limescale should be removed. With a simple touch of the screen you can select the appropriate function and activate the descaling programme.

### ProCooking

This function allows cooking in several stages, a system especially suitable for the preparation of soufflés and various types of dough.

### Steam Cooking

Steam cooking preserves all the nutrients and vitamins in the food.

### HotAir Cooking

The steam oven enables conventional dry-heat cooking of food. The fan circulates the hot-air around the oven and makes sure the food is evenly cooked.

### Regeneration

Steam combined with hot-air warms the oven faster, while maintaining the succulence of the food and ensuring it is evenly done. This function is especially useful in warming previously prepared, precooked and frozen foods.

### Combined Cooking

This method combines the advantages of hot air and steam cooking. The steam can be introduced at any moment during the cooking process. After 10 minutes the steam is shut off automatically – through if you wish, you can switch off even sooner.

### Low Temperature Cooking

The method of cooking at low temperature is suitable for food that requires longer cooking time. With the help of the probe enclosed with the steam oven, you will be able to prepare a delicious, evenly roasted meat dish.

## ESPRESSO COFFEE MAKER

### CAFFE. CAPPUCCINO. **AUTOCAPPUCCINO!** A COMPLETELY AUTOMATIC BUILT-IN COFFEE MACHINE

Gorenje's coffee machine distinguishes itself by superior performance. The modern shape of this machine features clean lines, enhanced by the sleek stainless steel appearance that blends in well with all contemporary kitchen trends.

### Autocappuccino

It is a unique function for the preparation of excellent Italian coffee with one single touch. A special button enables the brewing of a cappuccino preserving all its superior characteristics. Pleasure guaranteed at the press of a button.

### A Palette of coffee flavours

Just choose whole bean or ground coffee and leave it to the machine to prepare the beverage. The machine is enabled to five types of coffee, characterised by different textures and aromas. In addition, by selecting the preparation of two cups of coffee at a time you can enjoy an excellent coffee with company!

### Automatic regular cleaning

After brewing coffee you can activate the cleaning function by simply pressing the "CLEAN" button for a few seconds, thus guaranteeing antibacterial treatment both of the milk dispenser as well as of the inner suction tubes.

### Setting your own coffee making programme

It is just a simple way to set your own coffee making programme. The amount of coffee set after your own wishes will thus be available to you at a mere touch of a button.

### Easy access coffee container

The coffee storing container is easy to access, as the machine can be pulled out by means of telescopic guides. Coffee grounds are collected in a special container in the form of compact tablets. When the container is full or when the coffee bean container is empty, a warning appears on the display.

### Warming drawer

The functionality of the compact series can be further upgraded by a warming drawer, available separately. The drawer is installed right under the compact appliances, the entire composition fitting perfectly into the furniture element.

- Stainless steel finishing

**Features:**

- Electronic soft touch control with LCD display
- Language setting
- Automatic cappuccino function
- Can make: espresso & cappuccino
- Personalized programmes setting
- Making 2 cups simultaneously
- Frothing milk system
- Pre-grind system
- Pre-brew system
- Coffee usage: beans & pre-ground
- Auto start
- Auto shut off programme
- Timer
- 4 levels adjustable coffee strength
- 7 levels adjustable coffee pre-grinding
- 3 levels adjustable coffee quantity
- Adjustable water capacity
- Adjustable coffee temperature
- Adjustable coffee spout
- Indicator for filling coffee bean/ ground coffee container
- Indicator for cleaning
- Decalcification cleaning programme
- Removable milk container & water tank
- Removable brewing unit

**Technical information:**

- 2 heating elements
- 1 pump, pressure: 15bar
- Capacity :
- Milk container: 1L
- Water tank: 1.8L
- Bean container: 250g
- Total connected load : 1350W

**Accessories:**

- Measuring spoon
- Decalcifier

**Appliances dimensions:**

- 455H x 595W x 361D

**Built-in dimensions :**

- 450H x 560W x 550D

# A VARIED CHOICE FOR THE **ULTIMATE COOKING EXPERIENCE**

COOKING CAN BE A REAL PLEASURE, EVEN MORE SO WITH THE SMART SELECTION OF A SUITABLE MODEL FROM GORENJE'S LARGE RANGE OF HOBS.

## Time needed to heat 2 litres of water from 20° to 95° C

0 1 2 3 4 5 6 7 8 9 10 min

## Power needed to heat 2 litres of water from 20° to 95° C

0 50 100 150 200 250 300 350 400 450 10 Watt/h

## The most efficient and safest way to cook

Induction hob is being recognized as the most economical way of cooking. Food is heated faster than gas cooker, while consuming substantially less energy.

XtremePower:  
a true power boost

**XtremePower**

When the PowerBoost function is activated, the selected zone power can be maximized by switching the power between cooking zones.

SlideTouch control at your fingertips

SLIDER  
TOUCH

You can set the temperature by simply moving your finger over the multipoint temperature scale of the hob. Complete control over the cooking process at your fingertips is the result of the increased sensitivity and responsiveness of your hob.

SmartControl

Each cooking zone has its own module and a touch-controlled programme timer. Thus, cooking time can be set independently for each cooking zone and the programme timer will automatically switch off the zone after the set period of time has elapsed, indicating this with a beep.

FishZone Oval Heater

XtremePower induction hobs are fitted with a cookware sensor to deliver optimum cooking zone usage. Ample offer of induction hobs also includes a model with a special oval heater, particularly handy for cooking or frying fish or large chunks of meat.

## THE "4-IN-A-ROW"

With four ergonomically positioned cooking zones, the new "4-in-a-row" hob enables fully visibility as well as the placement of various utensils in front or behind the cooking areas.

### SoftMelt

These innovative functions will simplify the way you cook, prevent overheating, and save power. With the SoftMelt function, the cooking zone maintains a constant temperature of 42°C, allowing you to melt honey, butter, and chocolate without any additional hassle. Such setting is also appropriate for melting frozen ready-to-eat meals and minor quantities of frozen vegetables.

### StayWarm

The Staywarm function will keep your cooked food warm at an optimum temperature of 70°C. The food will thus retain the flavour and stay warm to be served later. An excellent addition to your cooking options!

### StopGo for maximum convenience

This feature allows you to temporarily suspend the cooking process when unexpectedly called away. One touch of the StopGo key freezes all settings, giving you time to go and safely deal with an emergency. All active heating zones are thus temporarily switched off until reactivated by the StopGo key.

## FOR YOUR MAXIMUM SAFETY

### BoilControl

This function prevents pans from boiling over as it automatically adjusts the temperature of all cooking zones. After the initial operation at maximum heat, the hob regulates the heat output to hold the temperature at the set level. It can be switched on or off any time. Your pans will never boil over ever again!

### Child lock for safety

The Child lock function prevents children from interfering with or resetting the selected parameters, thus also providing protection against accidental activation and operation of the hob.

### Overheat protection

It protects the electronic parts against damage as a consequence of excess heat. The device operates in several stages. When the temperature of a cooking zone increases considerably, it switches on a two-stage fan. Then, if necessary, it inactivates the power boost function, prior to any automatic reduction of power to the cooking zones and eventual switch off. When the hob cools down sufficiently, its entire heating surface and power is again available.

### Residual heat indicators (H)

Ensuring even greater safety, residual heat indicators illuminate to reveal which zones of the hob are still radiating heat. As long as an indicator is lit, the respective zone should not be touched. It can, however, be used for defrosting or maintaining a dish warm.

### Safety switch-off function

In order to ensure maximum safety, the uninterrupted operation of each hob is time limited. When the time limit of continual operation is reached, the hob switches off automatically.

# DOMINO HOBS FOR PLAYFUL JIGSAWS

Domino is a special range of 30-cm width built-in induction and gas on glass ceramic hobs, which can be assembled and installed in almost limitless combinations. This, any chef can make a selection of cooking zones tailored to their own tastes and needs.

## A gas hob with a professional touch

Modern gas hobs equipped with ergonomically designed knobs and distinguished by excellent visibility enable a nonpareil preparation of dishes. Gorenje gas cookers are characterized by their superior utilization of an open flame, which translates into a greater heat output and improved cooking performance.

## Durable pan support

Cast iron pan supports are extremely stable and highly temperature resistant. Optimal cooking performance is guaranteed.

## Automatic thermal protection

For improved safety in your kitchen, the gas intake valve automatically closes in the event that the flame extinguishes during the operation of a burner!

# HARMONY IN **FORM,** EXCELLENCE IN **TECHNOLOGY**

TODAY'S CUSTOMERS SELECTING COOKER HOODS ARE INTERESTED NOT ONLY IN TECHNICAL DETAILS AND CAPACITY, **BUT ALSO DESIGN.**

## STYLISH DESIGN

Contemporary kitchen ambient designs provide an infinite range of creative options when it comes to kitchen hoods. The outstanding functionality of Gorenje hoods is further enhanced by their exceptional stylish design. Innovative shapes complimented by a genuine metal finishes and halogen lighting add an entirely new dimension to your kitchen.

### AutoSense automatic hood

Controlled by a preset sensor, the hood reacts to any impurities or changes in the air. When switched off, it is closed; when switched on, it changes from a vertical-flow hood to a chimney hood that admits the air. This hood is distinguished by permanently clean glass; even when you do not have the time to wipe it clean; simply close after use, and the dirty particles will remain trapped inside.

### Easy clean filter

Filters can be cleaned by washing either by hand with mild detergent, or in a dishwasher using a 65°C programme. It is suggested to clean the filters roughly every two months.

## USEFUL TIPS

- Remember to switch the cooker hood on before starting to cook, as this maximizes the hood's capacity.
- Leave the cooker hood running for another 15 minutes once you have finished cooking to remove the last traces of cooking odours.
- Choose a cooker hood that is at least as wide as your hob to achieve the best effect.

## FRESH IDEAS, FRESH DESIGN, **FRESH FOOD**

ALL GORNEJE'S REFRIGERATORS ARE COME WITH INTELLIGENT AND BEAUTIFULLY DESIGNED SOLUTION TO GIVE YOU FRESH FOOD, LOW ENERGY BILLS AND A BEAUTIFUL KITCHEN.

## A+ energy efficiency

A bigger volume does not necessarily translate into a bigger electricity bill. In addition to excellent heat insulation, Gorenje refrigerators feature improved door sealing, as well as state-of-the-art cooling system components and refrigeration electronics, all of which are designed to minimize energy consumption. All Gorenje's refrigerators are certified with the Hong Kong grade 1 energy label and A+ or A performance rating from EU energy grading system, which can bring you energy savings of up to 25 %.

## No Frost advantage

The key advantage of the Gorenje No Frost system is the effective elimination of moisture from the freezer section only, whilst maintaining the correct level of humidity in the fridge section. This prevents food from drying out and ensures perfect conditions for the long-term storage of fruit and vegetables.

## LED display control panel

Electronic control via a LED display ensures a high level of accuracy when it comes to temperature control. Gorenje's built-in refrigerator also features separate temperature control of the fridge and freezer sections, which makes all the things under your control.

## Fast-freeze option

Use the fast-freeze option to rapidly freeze a large amount of fresh food. Operating at  $-32^{\circ}\text{C}$ , it preserves the quality of the food for longer.

## Antibacterial protection

The interior panels and doors of Gorenje fridges are coated with a special material containing an inorganic silver compound. By virtue of its inherent antibacterial properties, this protective coating prevents harmful micro organisms from propagating even in the presence of spoilt food as a result of prolonged storage past its use-by date. The protection keeps working for the entire life of the appliance.

### Cool 'n' Fresh drawer

The drawer is designed to preserve and lock in the freshness of highly perishable foods. A fan blows cold air directly into the compartment so that the temperature inside can be set and maintained at about 0°C. As a result, fruit, vegetables and meat remain fresher much longer.

### Constant temperature in the refrigerator

Due to a special ventilator, the cold air inside the refrigerator is constantly circulating. This provides quick and even cooling and reduces the accumulation of condensation on the back wall and under the shelves. It creates ideal storage conditions for all kinds of foods, which stay fresh longer.

### Split shelf

The shelf can be used as an ordinary shelf or it can be divided into two smaller shelves, which can then be placed one under another. This way, you can create a space for storing taller containers or bottles.

### NRS85725E Side-by-side refrigerator

#### Features:

- Electronic control with LED display
- No frost
- Separate temperature control for fridge and freezer
- Intelligent mode

# FOR THE **SOPHISTICATED** **LIFESTYLE** – A GLASS OF PERFECT PLEASURE

GORENJE'S WINE COOLER IS SPECIALLY DESIGNED FOR THE WINE-LOVER. WITH ITS CONTEMPORARY DESIGN AND INNOVATIVE FEATURES, YOUR FINE WINES ARE BEING LOOKED AFTER IN THE MOST IDEAL WAY.

### Tempered glass door with UV protection

The specially coated 2-layer tempered glass door is scratch and heat resistant and also protects the wine from the harmful effects of ultra-violet rays.

### Telescopic guides

Smoothly gliding shelves mean that you can select any bottle without disturbing the rest.

### Quiet operation

Sound-proof and quiet operation is achieved through special design solutions: shock absorbing feet, special designed compressor and double glazed door with sound barrier.

### Electronic control for accurate temperature setting

The temperature display shows the actual temperature inside the wine store. It allows you to adjust the exact temperature as you want. Gorenje's wine cooler also features tailor-made temperature setting for red or white wine, even for a wine lover in beginner stage, tasty wines are always reserved.

#### Built-under wine cooler XWC660E

#### Freestanding wine cooler XWC660EF

## THE EFFICIENT WAY TO **SPARKLING**

GORENJE DISHWASHER KEEPS YOU AWAY FROM THE DAILY CLEANING JOB. ITS SLEEK DESIGN CAN MATCH WITH **ANY KITCHEN STYLE.**

### AAA efficiency

AAA rating ensures optimal energy efficiency, cleaning performance and drying performance in the highest, A class.

### SpaceDeluxe

#### Remarkably spacious

A convenient third basket expands the dishwashing capacity to as many as 14 place settings! It comfortably holds cutlery and also allows placing longer cutlery items and coffee cups separately. Such layout also leads to better washing results, very simple use and optimum use of the washing space.

#### Clear water sensor

The water quality sensor monitors water purity until the water is completely free of impurities. This result in significantly reduced water consumption when washing lightly soiled dishes while delivering perfect cleaning results every time.

#### SpeedWash – 50% time shortening of chosen programme

With lightly soiled dishes you can cut the time of dishwashing in half by simply pressing the SpeedWash button. It automatically adjusts the temperature and water level, thereby ensuring optimal cleaning and drying in the shortest possible time.

## Hygiene programme

It includes an additional rinsing at the end of the washing cycle, leading to a sterilization effect. Hygiene programme can eliminate 99.9% of bacteria. It was specially designed for families with young children who require a high level of hygiene on children's plates and bottles.

## 3 in 1

Simply by activating the 3 in 1 function, your dishwasher will automatically detect which type of detergent you are using. If you are using a tablet, the dishwasher will adjust the washing cycle and omit using the rinse aid, making this function highly convenient. If you are using powder or gel detergent, the rinse aid is released to allow optimum dishwashing results and perfect shine.

## Height adjustable baskets - MultiClack system

Adaptability of both baskets enables washing larger items, oversized plates, stem glasses, cutlery, and all types of kitchen utensils.

### Large item spray head

This spray head is used for the cleaning of larger items such as baking trays, hood metal grease filters, fridge shelves or similar.

### More efficient spray

The new ergonomic shape of bottom sprayer enables that the water line is now more linear with less blocking. The result is more powerful water jet by the same power of washing pump. Best washing performance is then guaranteed.

### Self-cleaning filter

The automatic filter cleaning system washes out food leftovers and prevents it from clogging. Thus, it also prevents any problems and operation failures.

### AquaStop system

With the AquaStop safety feature, the dishwasher can be safely left to operate at night as well as in your absence. In case of leakage or flooding, AquaStop automatically cuts off the water supply while the pump siphons the residual water out of the dishwasher basin. AquaStop remains fully functional for the duration of the working life of the appliance.

## USEFUL TIPS

- On average class A dishwashers consume only 0.5kWh of electricity per washing-up cycle.
- Washing up in a dishwasher in one week saves the quantity of water, equivalent for a full bath, and the amount of saved electricity would suffice for the whole year of operation of another household appliance.

HARD ON STAINS,  
**EASY ON YOUR LAUNDRY**  
AND THE ENVIRONMENT

## THE FIRST interactive touch control machines

Gorenje developed the first washing machine in the market. The artificial intelligence touch control screen guides you through the logical selections on the easy-to-read interactive LCD display in the language of your choice.

UseLogic® technology

The innovative solution, UseLogic®, which automatically optimise the washing process, delivering significant savings in water, energy and time. The intelligent sensor continuously monitors the purity of water and the amount of foam, and automatically takes care of additional rinsing where appropriate, giving you an optimum washing results each and every time.

Excellent efficiency, considerable savings

Continuous development aimed at reducing energy consumption is part of our ongoing commitment to the environment. All models consume 10%, or even 20% less electric energy compared to energy class A.

Intelligent load sensor

The load sensor weighs the washing and automatically suggests the correct amount of detergent required. This gives valuable savings by optimizing your detergent use but never at the expenses of wash performance.

Clear water sensor

The sensor makes sure your laundry is perfectly clean without too much rinsing. During the second rinse cycle, the sensor checks how clean the water is. If the result is not satisfactory, the washing machine performs up to three additional rinses to ensure the clothes are clean.

Foam sensing

Too much foam makes for a poor wash. Gorenje's washing machines sense the amount of foam produced during the wash cycle. If too much foam is detected, up to 3 automatic rinses ensure your clothes will always be properly cleaned.

### Special drum design

Gorenje develops a special 3D rib that makes clothes fall directly into the center of the drum, in order to achieve the best tumbling result. And the machines feature a variety of tumbling rhythms that ensure optimum intensity for each textile. More than a thousand specially designed holes produce a perfect spinning effect.

### 17 minute wash

The Quick Wash option allows you to further shorten the time of the most featured programmes. Typically, this option is very handy for less soiled laundry, generating additional savings in time and water. Gorenje's fastest programme, Cotton, takes only 17 minutes to run, which means that your favourite clothes are done in no time at all.

### Wash Wizard

The wash process is simplified by allowing you to select the type of laundry, indicate the degree of soiling, and press Start. The washing machine automatically sets and runs the optimal cycle.

### Clean machine for perfectly clean laundry

The special Gorenje self cleaning programme operates at 80°C, it will keep the interior of your washing machine meticulously clean, so that your laundry is washed in a hygienic environment.

### 4D soaking

It quickly brings water and detergent into contact with laundry both from bottom, the top (the shower system) and the sides (jet system). This soak your clothes much faster and better.

### Extra water for allergy prevention

Selecting additional rinse cycles or Water Plus allows you to ensure that any residual stain remover, detergent and softener has been effectively rinsed out of your clothes and fabrics, which is vital for anyone allergic to these substances.

## Customized programmes tailored to your needs

Mix:

This programme makes it possible to wash a mixed load at 30°C, so there is no need to wait for a full load of a particular type of laundry.

Quick wash:

This option is very handy for less soiled laundry giving savings in time, energy and water.

Hand wash:

You can now wash your most delicate hand wash items with confidence using this specially designed gentle programme at 30°C.

Jogging:

Gorenje has designed the quick wash Jogging programme for lightly soiled clothes used for recreational activities or items which merely require freshening.

Easy ironing:

For more water and lower spin speed for intermediate and final spinning, this programme keeps the creases out of your clothes, making them easy to iron.

## Make your own special programmes

Premium Touch models allow you to create and store your own special programmes, a useful feature if you often repeat the same washing procedure.

## PMP- Program Misapplication Protection

PMP system simply won't allow you to set the wrong temperature or spin speed for your selected program.

## Enzymes at Work

Enzymes play a key role in removing dirt and stains, and the optimum temperature for activating enzymes is 40°C. So the first 15 minutes of every wash starts at 40°C, and will back to your selected temperature afterwards.

## Follow wash progress

All models let you follow the wash progress closely. On models with LCD display, you can, in addition, see water consumption, spin level and the number of minutes remaining.

## Stability Control System

The electronic system will automatically adjust the spin to the quantity and dispersal of laundry and also the silence of washing machine.

## Super Silent Design

When spinning, Gorenje washing machines make no much noise. Its Premium models are rated Super Silent. In addition, the Stability Control System (SCS) can also ensure that the machine stands perfectly still during the spin cycle.

### Stylish sliding detergent dispenser

Gorenje Premium Touch washing machine is fitted with a unique sliding detergent dispenser, which automatically slides in and out with the touch of a button. The functionally designed, easy-to-clean dispenser features three compartments and makes it easy to determine just the right amount of detergent and wash aids of all types.

### Detergent Saving System (DSS)

Gorenje washing machines feature a special, environmentally friendly Eco system, which prevents the loss of detergent during water intake. The detergent stays in the drum throughout the entire wash cycle. This saves up to 20% on detergent costs and effectively helps protect the environment.

### AquaStop – effective protection

Selected washing machines feature a multiple protection safety system, which is highly effective against any leakage. The system includes a valve on the water tap, a floating switch at the bottom of the washing machine tub, and an automatic water pump. In case of an inlet pipe failure, a mechanical device cuts off the flow of water into the tub. More advanced models have a water leak sensor installed in the bottom panel, which if there is any water leakage automatically shuts off the valve on the inlet pipe.

DRYER  
LESS IRONING MEANS,  
**MORE FREE TIME**

### UseLogic® technology

Gorenje dryers feature intelligent Use Logic® technology. Intelligent humidity sensors continually monitor the moisture content of your load and automatically adjust the time of drying accordingly. When the desired level of drying has been achieved, the dryer automatically ends the programme to prevent over drying.

### Touch control user interface

Gorenje Premium Touch is the only dryer fitted with a stylish, touch control display. It helps you select the optimal programme as well as other desired settings.

### Refresh programme

This programme is specially designed for freshening up clean clothes and fabrics. Cool air effectively removes unpleasant odours from your clothes.

### Special rack for sport shoes

A specially designed rack for delicate items can be mounted onto the drum of the dryer. Just spread your sweater across the rack and the wool will remain soft and fluffy. The rack can also be used to dry sport shoes as it keeps them from bouncing around inside the dryer. This also considerably shortens the drying process compared to just hanging items out to dry.

### Anti-Crease system to minimise ironing

Gorenje dryers feature an Anti-Crease system designed to reduce creasing. The tumble action and special 3D rib design prevent the garments from getting tangled or bundled up, which results in improved drying efficiency. A 10 minute period at the end of the drying cycle slowly cools down the laundry load to further reduce the possibility of creasing. Even when the dryer cannot be emptied immediately, your garments will not settle or crease by virtue of automatic periodic tumbling of the load for a minimum of one hour after the cycle has finished.

### Easy-to-clean filter

For optimal drying performance, regular cleaning of the filter and emptying of the condensed water container is required. The filter conveniently positioned on the dryer door, is easily accessible and its ergonomic design makes it just as exceptionally easy to clean.

### No Overflow

The sensor constantly checks the level of water accumulated in the lower condensation container. If water level becomes too high, a pump transfers water to the upper condensation container. If the upper container is full, the dryer will not function until it is emptied.

### No Overheating

The machines are equipped with a special sensor to avoid overheating. If overheating is detected, the machine stops operating. Dryers continue as soon as the electric motor cools down to normal level.
